Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 2 and 3 are objected to because of the following informalities: “the specific multicasting service” in claim 2 and “the network” in claim 3 are insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Maher et al. (U.S. Patent No. 6647020 B1).

- With respect to claim 1, Maher teaches a process for broadband Ethernet multicasting comprising the steps of:

(a) establishing a multicasting service whereby a multicasting address replaces an original address of at least one receiving party (col. 2, lines 41-50);

(b) receiving and sharing one multicasting data packet simultaneously among at least 2 multi-users in one transmission (col. 14, lines 21-25).

- With respect to claim 2, Maher also teaches wherein the multicasting address is a set of numbers to identify a specific multicasting service (col. 14, lines 5-15).

- With respect to claim 3, Maher further teaches wherein the set of numbers is called a multicasting address pool existing in each switch in a network (e.g. 120 in Fig. 1).

- With respect to claim 4, Maher teaches a multicasting process for establishing multicasting communication comprising the steps of:

(a) requesting a multicasting service module in a sub network to distribute a multicasting address (col. 13, lines 50-51);

(b) choosing one spare multicasting address from a local multicasting address pool and distributing said multicasting address to identify the multicasting service (e.g. the address from the memory 120 in Fig. 1 is selected for the multicasting service);

(c) authenticating all receiving parties to confirm receipt of the multicasting service; (d) notifying receiving parties of the multicasting address by a 'MULTICASTING COMMAND' signal (col. 14, lines 35-40).

- With respect to claim 5, Maher discloses wherein the multicasting communication module resides in each switches with the function of routing setup in service establishment and routing retrieving in communication procedure (Fig. 1 shows the function of routing to remote sites).

***Allowable Subject Matter***

4. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form PTO-892.
